

Safely delivering the Right Thing, First Time, On Time

We provide Engineering, Project Management and Technical Consulting services to the energy industry.

Xperto Offshore is an up to date business that offers services in the oil and gas sectors providing Engineering, Project Management and Technical Solutions to our client's problems. Our founding company ATRGE was established in 1998, and has been responsible for providing outstanding support to major capital projects ever since. Now our partner company Xperto Offshore, based in Mexico City, Mexico has been established to support the renewed interest in offshore oil and gas exploration.

Xperto Offshore will provide the engineering efficiency for your business by taking the problem away and providing a solution, or simply by providing additional resources that can be integrated into your team. Our specialist industry expertise and capabilities is there whenever you need it.

From project concept through design, fabrication installation and operation to decommissioning, Xperto Offshore provides your business with the appropriate engineering solutions.

Our passion about engineering has allowed Xperto Offshore to attract some of the brightest people in the industry who enjoy what they do and care about meeting our customer's needs, so you can feel confident that we are functioning as your engineering partner.

Xperto will also partner to reduce your risk significantly by supporting and identifying opportunities to eliminate or reduce financial, project, safety and operational risk to a minimum.
